

ARGUS Matrix

USER MANUAL

Please read entire manual carefully before using the product.

English

Thanks for your purchase of a VOOPOO product. For better use of all the functions of this product, please carefully read the operation notes and detailed functional instructions before first use. If you have any problem using this product, please contact our local agent or visit our official website at www.vooipo.com.

Parameters

Size:	93*27.9*16.5 mm (Excluding Cartridge)
Power Range:	10-30 W
Battery Capacity:	1350 mAh (Built-in)
Output Voltage:	3.2-4.2 V
Charging Voltage:	5 V / 2 A
Resistance Range:	0.4-3.0 Ω
E-liquid Capacity:	3 mL (Standard & US Version) / 2 mL (TPD Version)
Resistance:	All ARGUS Cartridges

Operation Instructions

Step 1. Fill e-liquid

Uncover the filling port and fill the e-liquid in. It is recommended to keep two-thirds full.

Step 2. Install the cartridge

Insert the cartridge into the device.

Step 3. Start using the device

Let the coil become saturated for about five minutes before using the device.

Device On/Off: Press the button 5 consecutive times.

Airflow Adjustment: Slide the Airflow Adjustment button to find the airflow volume that matches your vaping depth. If you feel the auto-draw is insensitive, you can slide to shorten the airflow inlet. When you feel the vapor temperature is too high, you can slide to lengthen the airflow inlet.

Power Adjustment: Short press the button 3 times and the current wattage number flashes. Press the button again to adjust the power.

Light On/Off: Short press the fire button 2 times.

Indicator Light Instructions

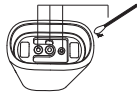

Situation	Screen	Light
Fire Up	Displays vaping duration	Light is on in white
Cartridge Detected	Displays cartridge resistance	Light flashes once
Cartridge Undetected	Displays "E1"	Light is on in red for 2 seconds
Short Circuit	Displays "E2"	Light flashes twice in red
Over Time Vaping	Displays "E3"	Light flashes 6 times in red
Overheat Protection	Displays "E4"	Light is on in red for 5 seconds
Low Power	Displays "E5"	Light flashes 5 times in red
Charging	Displays power level	Light flashes in green
Fully Charged	Displays power level	Light is on in green

Maintenance and Cleaning

1. When using the device, you may notice occasional liquid condensation on the outside of the cartridge/tank. This occurs because the liquid is vaporized, and as the vapor cools, it condenses on the outer surface, a common and inevitable physical phenomenon.

2. In daily use, you can often use a wet paper towel to wipe the connection between the device and the cartridge/tank to prevent poor connectivity.

3. If a small amount of condensate is found inside the device during use, we recommend removing the cartridge/tank, reversing the device, and shaking it for a few seconds.

Safety Protection

Overtime Protection: 5 s	Short-Circuit Protection	Low Battery Protection
Overcharge Protection	Over Temperature Protection	Output Over-current Protection

Notes

1. This product is not recommended for minors, non-smokers, pregnant or breast-feeding women, or anyone at risk of heart disease, depression and asthma.

2. Please keep the device away from heat, fire and water. This device should be stored in a cool and shady environment.

3. Please do not drop, throw or immerse the device in the water.

4. Please turn off or lock the device to avoid accidental firing when you carry it out.

5. Please rationally use the device according to your personal situation. If discomfort occurs, please stop using it immediately.

6. EEE Recycling: This product should not be treated as household waste. Instead, it should be taken to the collection place for the recycling of electrical and electronic equipment.

7. Battery Recycling: The product battery should not be treated as household waste. Instead, it should be taken to the used battery collection place for recycling.

8. It is recommended to use the USB cable provided by VOOPOO to charge the device.

9. If the device is not used for an extended period, it is recommended to charge regularly to prevent deep discharge!

10. The ambient temperature ranges from -5°C-30°C, with humidity 40%-75% RH. Operating temperature of the electronic cigarette: 0°C-40°C.

11. Disassembly is prohibited after product failure!

12. Only for indoor charging, please use a UL-certified USB charger to avoid the danger of fire and explosion!

Warranty

A three-month warranty is provided. During the warranty period, we will provide maintenance and replacement services. Please note the following conditions.

1. It only applies to the products registered on VOOPOO after-sales service website.

2. We assume no liability for damage caused by the user's negligence or accident.

3. We are not responsible for any damage that occurs during use, maintenance or modification that does not conform to the operating instructions in the manual.

4. The defects not caused by processing and the appearance problems are not covered in the warranty.

5. After-sales service for the coil is not provided.

Warm Prompt

Cartridge/Tank Leakage

There is a possibility of e-liquid leakage at high pressure when you travel by air. Therefore, please keep your cartridge/tank away from other important objects.

Deal with Condensate

There may be slight condensation due to the difference between indoor and outdoor temperature when you use the device. It is advisable to take out the cartridge/tank, and shake it downwards.
