

Thanks for your purchase of a VOOPOO product. For the better use of all the functions of this product, please carefully read the operation notes and detailed functional instructions before your first use of this product. If you have any problem with using this product, please contact our local agent or visit our official website at www.vooopoo.com.

Parameters

Size: 115*46.6*23.6 mm
 Power Range: 5-120 W
 Battery Capacity: 4500 mAh (Built-in)
 Output Voltage: 3.2-4.2 V
 Charging Voltage: 5 V / 2 A
 Resistance Range: 0.15 - 3.0 Ω
 E-liquid Capacity: 5 mL (Standard & US Version) / 2 mL (TPD Version)
 Resistance: 0.15 Ω / 0.3 Ω

Steps

Step 1. Install Coil

Take out the coil, and insert it from the bottom of the pod.
 Please ensure that the installed coil is level with the bottom of the pod.

Step 2. Fill E-liquid

Open the lid of the filling port, then fill the e-liquid.

It is recommended to keep two-thirds full.

Step 3. Install the Atomizer

Insert the atomizer with e-liquid into the mod.

Step 4. Start Using the Device

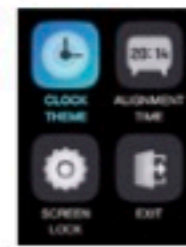

Let the device stand for about five minutes before using it. You can adjust the airflow by rotating the pod for the best vaping experience.

Interface Introduction

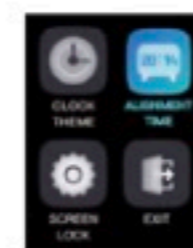

Operation Instructions

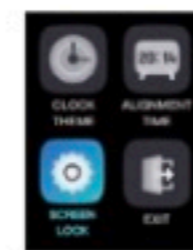

1. Power On: Short press the fire button 5 times.
2. Lock - Unlock: Use the toggle switch to toggle it up to lock and to toggle it down to unlock it.
3. Menu Screen: Press the "+" and "-" buttons simultaneously to access the settings screen. Use the "+" or "-" button to select the setting option, then press the fire button to confirm.

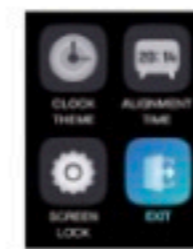

Short press the "+" or "-" button to select the "CLOCK THEME" you want, then short press the fire button to confirm.

Short press the "+" or "-" button to select the "ALIGNMENT TIME" menu, short press the fire button to enter the interface, then short press the "+" or "-" button to calibrate the hours, press the fire button to confirm, short press the "+" or "-" button again to calibrate the minutes. Press the fire button to confirm, and long press the fire button for 2 seconds to confirm and exit.

Short press the "+" or "-" button to select the "SCREEN LOCK" menu, short press the fire button to enter the interface, short press the "+" or "-" button to set the dial display time, and then long press the fire button for 2 seconds to exit. The setting range is 0-30 minutes.

Short press the "+" or "-" button to select the "EXIT" icon, short press the fire button to confirm and exit.

4. Output Power Switching: Short press the "+" or "-" button; each press will adjust the output power.

5. Charging: Support 5V/2A charging. It is recommended to use the Type-C cable provided by VOOPOO to charge the device.

6. GENE.TT: The chip supports automatic identification and matching, which intelligently generates and displays data such as battery level, vaping time, total puffs, output power, and resistance on the screen.

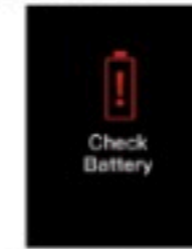

7. PUFF CLEAR: Press and hold the fire button and the "+" button for 2 seconds.

Maintenance and Cleaning

1. When using the device, you may notice occasional liquid condensation on the outside of the atomizer. This is due to the physical process where liquid atomizes and then condenses to form condensate, which is inevitable.
2. In daily use, you can often use a damp paper towel to wipe the connection between the device and the atomizer to avoid poor contact.
3. When a small amount of condensate is found inside the device during use, we recommend removing the atomizer, turning the device upside down, and shaking it for a few seconds.

Notes

1. This product is not recommended for minors, non-smokers, pregnant or breast-feeding women, or anyone at risk of heart disease, depression and asthma.
2. Please keep the device away from heat, fire and water. This device should be stored in a cool and shady environment.
3. Please do not drop, throw or immerse the device in the water.
4. Please turn off or lock the device to avoid accidental firing when you carry it out.
5. Please rationally use the device according to your personal situation. If

discomfort occurs, please stop using it immediately.

6. EEE Recycling: This product should not be treated as household waste, instead it should be taken to the collection place for the recycling of electrical and electronic equipment.

7. Battery Recycling: The product battery should not be treated as household waste, instead it should be taken to the used battery collection place for recycling.

8. It is recommended to use the USB cable provided by VOOPOO to charge the device.

9. During the long-term unused period of the device, it is recommended to charge regularly to prevent discharge!

10. The storage period of the equipment shall be within 3 months. The ambient temperature ranges from -5 $^{\circ}\text{C}$ -30 $^{\circ}\text{C}$, with humidity 25% \pm 75% RH. Operating temperature of the electronic cigarette: 0 $^{\circ}\text{C}$ -40 $^{\circ}\text{C}$!

11. Disassembly is prohibited after product failure!

12. Only for indoor charging, please use a UL-certified USB charger to avoid the danger of fire and explosion!

Warranty (Quality Assurance Certificate)

A three-month warranty is provided. During the warranty period, we will provide maintenance and replacement services. Please note the following conditions.

1. It only applies to the products registered on VOOPOO after-sales service website. (Scan the QR code below to register)
2. We assume no liability for damage caused by the user's negligence or accident.
3. We are not responsible for any damage that occurs during use, maintenance or modification that does not conform to the operating instructions in the manual.
4. The defects not caused by processing and the appearance problems are not covered in the warranty.
5. After-sales service for the coil is not provided.

Warm Prompt

Pod Leakage

There is a possibility of e-liquid leakage at high pressure when you travel by air. Therefore, please keep your pods away from other important objects.

Deal with Condensate

There may be slight condensation due to the difference between indoor and outdoor temperature when you use the device. It is advisable to take out the pod, and shake it downwards.
